High Definition Sound

PLENUE J

Perfect Sound, Perfect Design

## High Quality 24-bit DAC for the Purest in Sound Reproduction

The PLENUE J is equipped with a high-quality 24bit/192kHz stereo DAC to faithfully reproduce 24bit high-resolution original studio-quality audio without distortion or loss of sound.

## Another Criterion for Perfect Sound JetEffect 5 & BBE+

JetEffect 5 and BBE+ combine to correct sound distortions and phase caused by either the physical limitations of a receiver or the listening environment and reproduce sound closest to the original studio recording. In addition, users can create their own optimal sound according to their personal preferences via the use of BBE+ and EQ filters.

**5 Band EQ Filter** Advanced settings to adjust the frequency and width of each band.

**BBE** High-definition effects to sharpen sound. (Phase correction)

**Mach3Bass** Bass booster to enhance super low-end bass.

**3D Surround** Three-dimensional sound for an enhanced sense of space.

**MP Enhance** A feature for compensating lost sound segments.

**Reverb\*** A reverb effect for enhanced realism

**\* Reverb Mode** Chamber, Room, Club, Hall, Auditorium, Cathedral, Stadium, Canyon, Long

### Sensual Graphic Interface

GUI design was started with the purpose that it can give users the most intuitive and easiest look. High-resolution album art, matrix browser, and two sophisticated player skins all combine to provide unparalleled visual satisfaction. In addition, A variety of GUIs can be created through a UCI environment that allows users to customize their own interface layouts.
