## The inventor of flashdrive for iPhone / iPad

The growth of iPhone and iPad in 2009 changed consumers' habits drastically. Nonetheless, the inconvenience of transferring data and backup deeply concerned PhotoFast CEO – Warren Wang. Hence, this inspired him to start working on the world's first flash drive that connects iOS device and PC. This innovation not only opened up the door to Apple iOS but became the best solution for transferring data between iOS devices and PC. After two years of research and development, PhotoFast launched the world's first i-FlashDrive made for iPhone in 2011.
