

Weather@Home Bluetooth-enabled Weather Series BAR218HG, RAR213HG, EMR211

A choice of hassle-free ways to check the weather

Looking for a chic, space-saving home weather station that not only lets you see reliable up-to-the-minute weather updates at a glance and also offers you the added convenience of an App for your Smartphone or tablet? Then look no further than our handy new Weather@Home Bluetooth-enabled Weather Station!

Offering you the added convenience of App connectivity, Weather@Home lets you view weather updates via either its main unit or Bluetooth Low Energy (BLE) enabled smart device. It also eliminates the hassle of having to search TV listings or the web each time you need a trustworthy weather forecast. Best of all, its low-latency rating and 50m transmission range means you can freely move around your house while checking out the latest updates or while planning camping or hiking trips.

Weather@Home Bluetooth-enabled Weather Collection

BAR218HG, RAR213HG, EMR211

Product benefits

- **Bluetooth-enabled convenience**

Easily connectible via Bluetooth, Weather@Home offers you the convenience of being able to check the weather on not only its main unit but also any linked Smartphone or tablet. Best of all, with a 50m transmission range and low latency, you're free to check the latest forecasts from almost anywhere in your home.

- **Stay ahead of drastic climatic changes***

Displaying useful alerts such as "HEAT", "WIND", "STORM", "FOG" and "FROST", Weather@Home's master unit ensures sudden major climate changes will never again take you or your family members by surprise.

- **View the last 7-days worth of weather**

Weather@Home's Smartphone App lets you click onto a line chart overview of weather for the last 7 days. It all adds up to an incredibly easy way to stay better informed.

- **Accurate, auto-synched display times**

Automatically synchronizing time display on main unit with the clock of your smart device, Weather@Home means no more wasting valuable time messing around time setting.

- **Easily customizable sensor labeling**

An easily adjustable sensor labeling feature means it's incredibly easy to identify and label different areas in your home on your App.

** BAR218HG only*

Target audiences

- **Busy city dwellers** who prefer the convenience of 'weather at a glance' to having to waste valuable time turning on the TV or visiting a website
- **Parents** who want to guard against chills and damp around their young ones.
- **Outdoors lovers** who want to be aware of extreme weather long before they set out on a camping trip or hiking expedition
