

LW301 & LW302 Anywhere Weather Kits

Get Home Weather Data from anywhere!

Track the weather at home from anywhere in the world through your smartphones or computers! The Anywhere Weather Kit automatically uploads weather data to your online storage for easy access to up to a year's worth of meteorological data, and even allows you to share data automatically with others. Now you can monitor your house in fair weather and foul, even when you're miles from home!

Features

- View real-time and historical weather data collected from sensors via your smartphones or computers
- Comprehensive weather data, including barometric pressure, temperature, humidity, rainfall, wind speed, wind direction and UV (optional sensors required)
- Set custom alerts to your smartphones
- Easy set-up that requires no router settings
- Support for up to 8 temperature humidity sensors to collect data from different locations (This package comes with 1 temperature humidity sensor only)
- Access to data recorded and shared by other users
- Online storage of data
- Compatible with protocol 3.0 sensors

LW301 & LW302 Anywhere Weather Kits

Product benefits

- **Check and Share Weather – Anywhere!**
Your weather data is stored online, so you can check real time and historical conditions from any Internet-connected device, as well as share the data with others via smartphone apps.
- **An App for Everyone**
Android and iOS apps let you register your personal location, share real-time weather data, connect with friends and other users, and view data graphs for the previous week.
- **Look Back to Plan Ahead**
View up to a year of weather information in your personal online storage, so you can better see the bigger picture and better predict seasonal patterns.
- **Plug and Play – No Router Settings Required!**
Just place sensors and connect the unit to your network.
- **Stay Alert of Bad Weather**
Set your app to deliver an alert to your smartphones when the weather turns bad, so you know what you're coming home to!
- **Multi-zone Monitoring**
The Anywhere Weather Kit supports up to 8 temperature humidity sensors, so you can monitor multiple locations through one remote feed!
- **Your Total Weather Solution**
All-in-one solution covers both your hardware and one full year of online data backup service.

Target audiences

- Amateur meteorologists who enjoy studying the weather and want to share their hobby with others.
- Homeowners who want to monitor weather conditions at home while they're away.
- Working parents who want to be sure their little ones are comfy and cozy, whether they're in the next room or a continent away.
- Schools and educational institutions in need of fully-loaded teaching tools to help students understand how weather works from day to day.
- Resorts, golf courses and tourism destinations in need of hands-on tools for monitoring weather conditions around their properties.
