EXPLORE. RECHARGE.

PRODUCT CATALOGUE

# Explore. Recharge.

At Powertraveller, we are on a mission to enable our customers to enjoy nature on their own terms with the help of lightweight, portable power sources. Technology helps us get the most out of the time we spend outdoors: It keeps us connected with our loved ones and fellow adventurers, lets us capture unforgettable moments and charges critical devices in the field.

Yet a relaxing weekend in the fresh air can quickly turn into a frustrating or even dangerous situation when a device is low on power. So, for more than fifteen years, we have been designing, developing and manufacturing award-winning portable power and solar solutions that extend the usability of a wide range of electronics.

We are continually updating and enhancing our product line with new releases and creating tools to educate retailers and consumers about our product features. Building up our ambassador network and partnering with elite athletes and endurance events will catalyse our research and development. More than ever, Powertraveller needs to be more versatile, sustainable, scalable and innovative to extend those benefits to the everyday recreationist. We are evolving rapidly to meet current environmental, technological and social demands – and to plan for a sustainable future.

Our team is committed to delivering products that let you focus on exploring the beauty in front of you. Create life balance and extend your retreats into the great outdoors. Take Powertraveller products with you and re-discover your connection with nature.

**Gerard Reusing**, CEO  
CEO, Powertraveller International Ltd.

DÉMARREUR PORTABLE | ARRANQUE DE SALTO PORTÁTIL | DISPOSITIVO DI AVVIAMENTO  
PORTATILE | TRAGBARER STARTHILFE | BÆRBAR HOPPE STARTER

Portable emergency jump starter for 12V vehicles (7.0L Petrol and 4.5L Diesel) including car, motorbike, snowmobile, lawnmower and more. Integrated torch with flashlight, strobe and SOS settings. Redstart 50 is also capable of providing power to laptops that charger via USB-C, making it a truly useful piece of kit. Dustproof and waterproof design to IP67 rating and housed in a fire retardant casing. Super safe and easy to use with reverse polarity protection, spark-proof technology to jump start a car under safety and smart technology which shuts off power if device becomes too hot.

## OEM CAPABILITIES

Customisation is key in the outdoor market, and our research & development team offers 20 years' experience of delivering bespoke items to both OEM and end-user clients. From the packaging to products, Powertraveller can deliver designs unique to your company that match your customers' specific needs. We can even coordinate and execute end-to-end manufacturing and distribution, making Powertraveller a one-stop shop for custom power solutions.

We are always open to new opportunities to expand our product offering into different markets and applications. Talk to your Powertraveller sales representative about developing an existing Powertraveller product, your specific packaging and branding vision and/or creating a new product to fit your power requirements.

### CASE STUDY: CANON CAMERANUT

Recharging camera batteries is a major issue for photographers working in extreme and remote environments. To address this factor, Canon asked us to design, develop and manufacture a mobile camera-charging pack for the Canon EOS camera range that gives photographers the ability to recharge batteries off-grid and stay in the field as long as they need to get the shot.

### CASE STUDY: GARMIN EDGE BATTERY PACK

To complement the launch of their Edge range of handheld and mountable GPS units, Garmin approached us to craft a customised version of one of our best-selling products, the Powermonkey Explorer. We designed a bicycle bracket for the battery pack and manufactured the unit complete with the correct adaptor for the Garmin Edge unit. The Garmin Edge External Battery Pack is now sold as an additional accessory to the Garmin Edge GPS product line.

## SALES TOOLS

Collaborations with Powertraveller result in one-of-a-kind products that customers love to use. We can help you sell your items in several ways:

## TRAINING

There is no better salesperson than one who is enthusiastic about the product and can discuss its features and benefits easily with customers on the floor. Knowledgeable staff assure potential buyers of their purchasing decisions and create an atmosphere of trust with your customers that leads to repeat business.

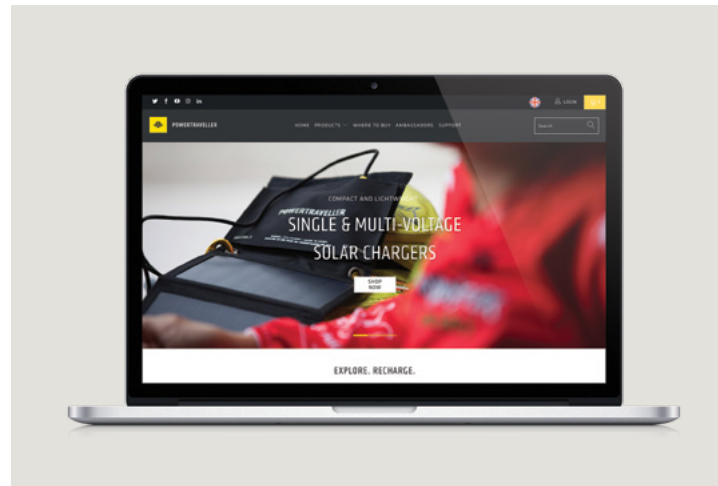

We recognise the value that training adds to the sales process, so we have invested heavily in creating and implementing training programmes across the world. Your Powertraveller sales representative can help you arrange sessions with your employees.

## RETAIL DISPLAY UNITS

Developed to accommodate the outdoor retailer's limited square footage, Powertraveller's FSDUs and CTUs incorporate informative text panels and clear branding into a minimal footprint. Stand-fills and graphics can be tailored to suit your individual needs.

## PACKAGING

As the outdoor market is continuing its upward trend our new packaging is designed to attract a broader, more diversified customer base. We complement the sleek design of the product inside the box with a light grey and warm yellow colour scheme that appeals to both men and women and evokes the reflective, immersive experience in nature they desire.

## WEBSITE

Web-based purchasing continues to skyrocket, but we understand the need to strike a balance between our retail and online sales. Powertraveller's website carries live links to all of our distributors and retail partners, helping customers buy online as well as on the high street. We also offer a map-activated shop locator that allows customers to find their nearest stockist quickly.

## USER GUIDES & DATASHEETS

Downloadable user guides and datasheets provide product information that's useful to both consumers and retailers. Powertraveller documentation explains not just how a product operates, but why it is perfect for a particular application and how it stands out from the competition.

# OUR PARTNERSHIPS

## RED BULL X-ALPS IS BACK

Born in 2003, the Red Bull X-Alps is the world's toughest adventure race—a bold claim, but one it surely deserves. Premier outdoor athletes consider it the ultimate competition, as it tests their limits in a unique combination of disciplines: mountaineering and paragliding.

It's an incredible challenge, demanding not only expertise in multiple skill sets, but also extreme endurance. Approximately 30 athletes must race through the Alps, by foot or paraglider, over a straight-line distance of approximately 1,000 kilometres. Some competitors will hike more than 100 kilometres in a day and will have covered over 900 kilometres on foot by the time the race is over.

People all over the world follow the race on the Red Bull X-Alps website, using its unique live-tracking feature that displays the real-time positions of each athlete in beautiful 2-D/3-D maps. Helicopters with nose-mount systems capture the action and distribute the footage to TV stations across the globe, showcasing not only elite athletic talent, but also the products they rely on in the most critical situations and consequential environments.

Rugged conditions demand rugged accessories, and Powertraveller has been a dedicated official sponsor of this marquee event since 2015. We're proud to continue to supply Red Bull X-Alps athletes with product to keep their essential electronics, such as GPS units, charged throughout the entire race.
